**We offer
tours, talks
and
workshops**

BEHIND THE SCENES TOUR OF RESOURCE

Join us for a tour of what we do to help reduce waste going to landfill. We'll show you the treasure in trash and talk about the weird and wacky things we've discovered salvaging at the McRobies Waste Management Centre (the tip). We'll take you through our different waste busting areas including: e-waste and scrap metal recycling, computer repairs, timber reclamation, online sales, electrical testing, our art from trash exhibition, collectables and our shop. This tour provides a great opportunity to see some of the waste challenges our community faces and explore some of the solutions!

Duration: 30 minutes to 1 hour

Fees: Schools, childcare and not for profit organisations: \$55 per tour. For profit organisations and government organisations: \$70 per tour.

TOUR OF THE MCROBIES WASTE MANAGEMENT CENTRE

We are partnering with the City of Hobart to take you behind the scenes of the McRobies Waste Management Centre (the tip). We'll show you where the City's trash goes, and how the City is making treasure from some of its largest waste sources. You might even get the chance to spot our team salvaging for treasure too!

Note – This tour is in addition to our behind the scenes tour of Resource and requires a bus with 1 seat available for our worker to deliver the tour.

Duration: 30 minutes

Fees: Schools, childcare and not for profit organisations: \$45 per tour. For profit organisations and government organisations: \$60

WORKSHOPS

Wooden doll and robot making

Join Professor Wiggle at Resource to make your own quirky characters out of timber, metal and other reclaimed materials. Kids will learn how to design and construct a robot or dolls by using reclaimed materials and long lasting and repairable attachment techniques like screws, laces and wooden dowels. This is a glue free workshop. Kids need to bring their imagination and sense of humour, we'll supply the rest.

Duration: 1-1.5 hours Fee: \$290-\$320

Sewless bag making

Textile waste is one of our biggest challenges as a community. In this workshop participants get to learn about a common textile waste - clothes, and get to discover how to transform an everyday t-shirt using just a pair of scissors into a reusable bag to take home.

Duration: 30 - 45 minutes Fee: \$145

The Ultimate Repurposing Challenge

Rethinking waste into a valued resource helps us keep precious goods and materials out of landfill. In this workshop participants will be given the challenge to design a usable object, and then create it using only the materials and equipment in the room in a designated amount of time. Add to the design challenge by choosing to only use a particular waste stream such as textiles or metals, or bringing an object from home that would otherwise be recycled or end up in landfill and work to repurpose it. End products are only limited by time and creativity of participants. Examples of repurposed items created include clothing, a teddy bear, a piece of art or wind chime.

Duration: 1-2 hours Fee: \$290-\$360

TALKS

Invite us for a talk where we will share the story of the Resource Work Cooperative and the power of community in tackling waste. As we take you on Resource's journey and our program areas, we aim to inspire and empower people to take action to reduce precious goods and materials from ending up in landfill.

Duration: 30 minutes to 1 hour

Fee: \$55 within Greater Hobart area
